Jens Laufer

Senior Full Stack Developer — Java and Spring Boot back-ends, Vue.js front-ends, features owned from requirement to handover

Java · Spring Boot · REST / OpenAPI / Swagger · JPA / Hibernate · Maven · Apache Kafka · Vue.js · JUnit / Mockito / TDD · Playwright · Docker · Kubernetes / Rancher · GitLab CI · Keycloak / OAuth2

I build Java back-ends and Vue.js front-ends and own a feature from the business requirement to the handover. At Deutsche Telekom I took over a prototype for configuring telecom devices, built the Spring Boot microservices and the Vue.js front-end, and ran it in production on Kubernetes with Rancher and GitLab CI. At DigitalMarketer.com the same split: Spring Boot services with OpenAPI interfaces and Vue.js/Quasar front-ends. At Brunata I built REST services with OpenAPI and Swagger, test-driven, in a remote team. 29 years as a freelance developer, most of them in Java client teams, including Volkswagen (Kafka, Spring Boot), Condor (JPA) and 1&1 (Hibernate). Since 10/2025 I also build LLM agent systems with Python and FastAPI. I work remote, in English or German.

FOCUS

Java + Vue.js full stack in production: Spring Boot microservices with a Vue.js front-end at Deutsche Telekom and DigitalMarketer.com — build, deployment and operation included.

REST and contract-first APIs: OpenAPI and Swagger at Brunata, Volkswagen and DigitalMarketer.com; JPA/Hibernate persistence; Maven builds.

Event-driven: Apache Kafka at Volkswagen (Connected Van); prepared a Kafka data pipeline at Sellics.

Testing as the default: JUnit, Mockito and TDD as the standard in my Java projects; Playwright for end-to-end tests since 2022.

Cloud delivery: Docker, Kubernetes with Rancher, GitLab CI pipelines I built and maintained myself.

ROLES

Full-stack engineering · Solution design · Backend engineering · DevOps · Build & configuration management · Data analysis · Prototyping · Machine learning · Jenkins plugin development · Maven plugin development

SKILLS

API / INTEGRATION

REST · Swagger · OpenAPI · SOAP · Webservices · CXF · XFire · Kafka · ServiceMix

LANGUAGES

Java · JavaScript · TypeScript · Python · R · Groovy

MICROSERVICES / BACKEND

Spring Boot · Spring · Spring Data · Spring Integration · Spring Security · OAuth2 · Microservices · Feign · Sleuth · Zipkin · Python Eve · Python Flask · Java EE · EJB

FRONTEND

Vue.js · React · AngularJS · GWT · Quasar · HTML · CSS · Bootstrap

DEVOPS / CLOUD

Docker · Kubernetes · Rancher · GitLab CI · Jenkins · Maven · Grunt · npm · Artifactory · AWS (EC2, S3, SageMaker, VPC) · Microsoft Azure · DigitalOcean

PERSISTENCE / DATABASES

MySQL · MongoDB · PostgreSQL · Oracle · Neo4j · JPA · Hibernate

SECURITY / IAM

Keycloak · Spring Security · OAuth2

TESTING

JUnit · TDD · Mockito · Selenium · DBUnit · Playwright

MACHINE LEARNING

scikit-learn · Keras · DeepLearning4J · CNN · Transfer Learning · Supervised/Unsupervised · k-means · PCA · t-SNE · Reinforcement Learning · OpenAI Gym · Topic Modeling

DATA SCIENCE

pandas · numpy · dplyr · Jupyter · RMarkdown · ggplot · seaborn · Vega-Lite · A/B Testing · Webscraping

TOOLING / OTHER

Git · GitLab · Subversion · Jira · Confluence · Kibana · ANTLR · JavaCC · ZXing (QR) · PayPal API · RDF/XML/JSON · SAP (BAPI) · Phonegap · JBoss · Tomcat

PROJECT HISTORY (SELECTION FROM 2010)

since 10/2025
ongoing

Autonomous AI business partner — Harness & agentic engineering

Solytics GmbH · Remote — AI / Automation

Harness engineering · Agent engineering · AI system architecture · DevOps

A self-directing agent built on Claude that plans, writes code, tests, deploys and reports around the clock. Built as a **harness engineer** — the engineering around the model: the **agent loop** and its stop conditions, **tool use over MCP**, layered **memory** (durable facts, running context, session state), **approval gates** for anything irreversible, **observability** over every run, **budget and rate-limit control** with model routing, plus recovery when a run is killed mid-flight. More than 40 purpose-built checks catch the agent's mistakes before they reach a human. Event-driven over Telegram, GitHub and systemd; runs on own hardware behind a local multi-model proxy.

Claude / Anthropic API · LLM-Agenten · Agent Harness · Tool Use / MCP · RAG · Prompt Engineering · Python · systemd · Telegram Bot API · Docker · TDD

Digital property profile for owners

verkaufe.immobilien · Remote — Internet

Full-stack engineering · Solution design · DevOps

Full-stack development of a digital property profile that owners create and maintain themselves: Vue.js front-end, Python back-end (Eve) with a REST API and MongoDB. Built and maintained the GitLab CI pipelines for automated build and deployment. Worked to DevOps principles, owning build and operation of the services in Docker. Test-driven development, automated end-to-end tests with Playwright.

Python · Python Eve · MongoDB · TDD · Vue.js · Docker · GitLab · GitLab CI · REST · Playwright

Front- and back-end, heating cost billing

Brunata · Remote — Industry

Full-stack engineering · Solution design · DevOps

Production server-side services and APIs in Java and Spring Boot: a microservice that parses and generates heating-cost files in the Haweiko-Arge industry format. Designed and built in a microservices architecture with REST interfaces (OpenAPI, Swagger), secured with Spring Security and Keycloak, persisted in MongoDB. Built and maintained the GitLab CI pipelines for automated build and deployment. Worked to DevOps principles, owning build and operation of the services in Docker. Test-driven development (JUnit, Mockito), automated end-to-end tests with Playwright. Front-end development.

Java · Spring Boot · MongoDB · JUnit · TDD · React · Docker · GitLab · GitLab CI · Spring Security · Keycloak · Mockito · OpenAPI · Swagger · REST · Microservices · Playwright

Payment back-end migration Java EE → Spring Boot

Condor · Remote — Marketing

Backend engineering

Migrated an EJB-based Java EE payment back-end to Spring Boot and shipped it as a Docker container.

Java · Java EE · JPA · Spring Boot · MySQL · Docker · Mockito · JUnit · TDD

Software and data analysis in marketing

DigitalMarketer.com · Remote — Marketing

Full-stack engineering · Prototyping · Solution design · Data analysis

Server-side services in Java and Spring Boot: web-scraping microservices plus microsites (Vue.js, Quasar) with a Spring Boot back-end for calculators, surveys and questionnaire funnels; data analysis in R. Designed and built in a microservices architecture with REST interfaces (OpenAPI, Feign), persisted in PostgreSQL and MongoDB. Built and maintained the GitLab CI pipelines. Worked to DevOps principles, owning build and operation of the services in Docker and Kubernetes.

Scrum · Spring Boot · Docker · Kubernetes · Microservices · REST · R · Python · Java · OpenAPI · Feign · JUnit · TDD · Mockito · Vue.js · Quasar · MongoDB · dplyr · GitLab CI · GitLab · PostgreSQL · Python Eve · Python Flask · DigitalOcean · Webscraping · A/B Testing · Topic Modeling

Marketing campaign tooling

DigitalMarketer.com · Remote — Marketing

Full-stack engineering · Solution design

Tools that generate marketing campaigns and publish them to Google Ads and Twitter Ads: Java/Spring Boot microservices with REST interfaces (OpenAPI, Feign), Vue.js/Quasar front-end, storage in AWS S3. Designed and built in a microservices architecture. Built and maintained the GitLab CI pipelines. Worked to DevOps principles, owning build and operation of the services in Docker and Kubernetes.

Scrum · Spring Boot · Docker · Kubernetes · Microservices · REST · Java · OpenAPI · Feign · JUnit · TDD · Mockito · Vue.js · Quasar · AWS S3 · GitLab CI · GitLab

Web-based configuration of telecommunications devices

Deutsche Telekom · Darmstadt/Remote — Telecommunications

DevOps · Build & configuration management · Full-stack engineering

Took over an existing prototype for configuring telecommunications devices over a web interface, developed it further and moved it into production. Production server-side services and APIs in Java and Spring Boot in a microservices architecture (REST, Feign, Spring Data/JPA), Vue.js front-end, secured with Keycloak, persisted in MySQL and MongoDB. Worked to DevOps principles, owning build, operation and monitoring of the services: Docker and Kubernetes (Rancher), logging and tracing via Kibana, Sleuth and Zipkin; built and maintained the GitLab CI pipelines.

Java · Spring Boot · Docker · Kubernetes · Microservices · REST · Spring Data · JPA · JUnit · TDD · Mockito · Vue.js · MySQL · MongoDB · HTML · CSS · GitLab · GitLab CI · Rancher · Kibana · Feign · Keycloak · Sleuth · Zipkin
